

Changes to Display Options for Macmillan Partner Cloud Content

Advisory Information

The Macmillan integration within Blackboard's Partner Cloud product will no longer be supporting the display of content within the same window or frame. All new launches of Macmillan content will be displayed in a new window or tab within the user's browser.

Additional Details:

Users will not need to make any changes within the Partner Cloud settings. Changes will occur at the cloud level and will automatically update user environments to the correct setting. Administrators will no longer see the option to select **Open Macmillan Content in same window** from the Partner Cloud settings for Macmillan. The support of 'Just-In-Time' grades will no longer be supported with the Macmillan integration. However, grades will still continue to sync and be visible in the course gradebook by using the offline grade mechanism.

If you have any questions, please contact [Blackboard Client Support](#).
