

# The Notification Panel in Flexible Grading's View of Questions Tab Causes the Last Attempt of Question Pool to be Cropped

## Article Number

000078245

---

## Description

When Question Pools with random selection of questions are used, the notification panel added to the Flexible Grading's view of Questions Tab causes that part of the last question to be cut when scrolling down.

## Steps to Replicate

1. Log into **Blackboard Learn Ultra Experience** as an administrator
2. Create an Ultra Course and enroll 1 instructor and 4 students
3. As an instructor create a **Question Bank** with 4 questions. For example, True/False
4. Create a test and select **Add Question Pool**. Select the 4 questions you created and set 3 questions to be displayed to students
5. As students take the test
6. As an instructor access the flexible grading view and switch to **Questions** tab
7. Observe there is blue stripe notifying that 'The questions was 1 of 3 drawn from a pool of 4 questions. Only student attempts that included this question are shown'
8. Make sure to be on the question that has at least 4 attempts from different students submitted
9. Scroll to the bottom
10. Toggle at the unwrap button of the last attempt and observe

## Observed Behavior:

The blue panel with notification causes that part of the box with the last question to be cropped.

When wrapped, the unwrap button is barely visible.

## Expected Behavior:

The notification panel should not influence how the rest of the content is presented.

## Additional information about the replication:

If there are multiple attempts and another notification strips are added about "This answer is not part of the student's latest attempt at the assessment" to two of the attempts, it can be visible already when 3 students had the same question.
