Information

Product Functionality

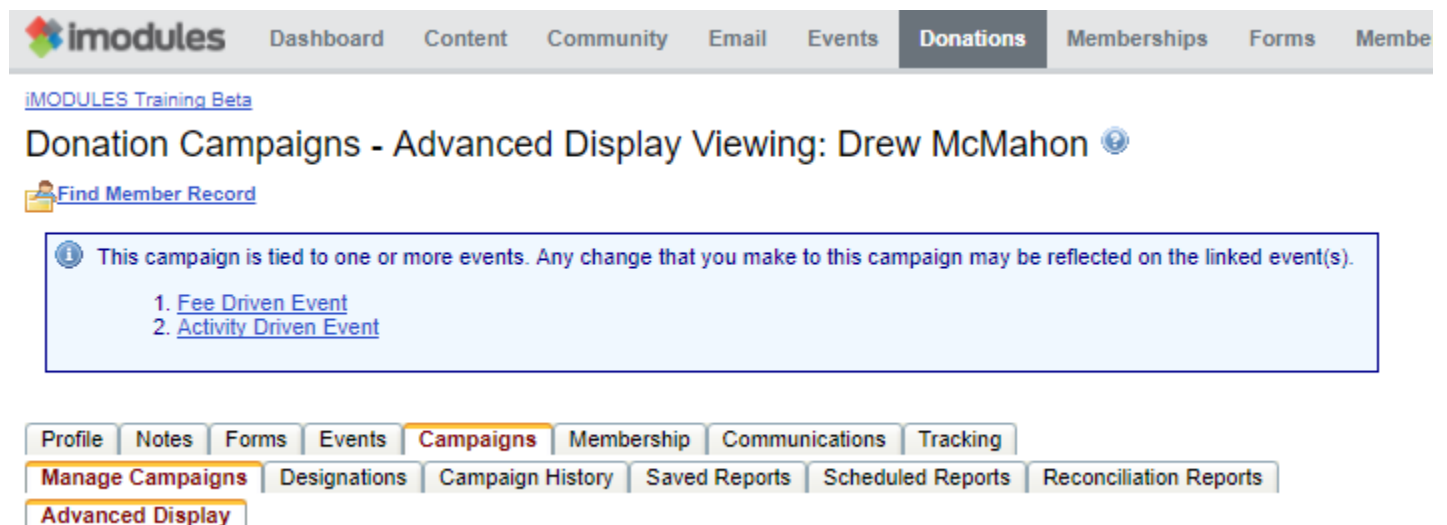

Campaigns

Viewing campaigns that are tied to events now displays a new prompt, as shown below.

The screenshot shows the iModules interface with the 'Donations' tab selected. The page title is 'Donation Campaigns - Advanced Display Viewing: Drew McMahon'. A red box highlights a blue information prompt: 'This campaign is tied to one or more events. Any change that you make to this campaign may be reflected on the linked event(s). Show more'. Below the prompt is a navigation menu with 'Campaigns' selected, and a sub-menu with 'Advanced Display' selected.

Clicking the "Show More" link will display the full list of links to each event that utilizes the selected campaign, as shown below. Selecting a link in the list will navigate to the event's form.

The screenshot shows the iModules interface with the 'Donations' tab selected. The page title is 'Donation Campaigns - Advanced Display Viewing: Drew McMahon'. A blue box highlights a blue information prompt: 'This campaign is tied to one or more events. Any change that you make to this campaign may be reflected on the linked event(s). 1. Fee Driven Event 2. Activity Driven Event'. Below the prompt is a navigation menu with 'Campaigns' selected, and a sub-menu with 'Advanced Display' selected.

iFraming Encompass Content

As part of our continued commitment to security, and an important part of our PCI compliance, effective with the July 31 Product release, we will no longer be able to allow iFraming of Encompass-served pages to external sites.

iFrames are a convenient tool to show external content within a frame on a webpage; however, this functionality allows for malicious behavior. As a result, we will no longer allow iFraming of Encompass-served pages. You can read more on our "[From the Desk of the CTO.](#)"

If you have questions as to whether this affects your or not, please contact Application Support.

Issue Resolution

Web Services

ENC-28962 - Resolved an issue where a member with multiple event registrations was causing errors in GetMembersChanged web service.
