

# SafeAssign and Turnitin are Both Enabled in Ultra Assignment at the Same Time

## Article Number

000090352

---

## Description

When an assignment is copied from a course associated with a hierarchy node where only SafeAssign is enabled into a course associated with a node where both SafeAssign and Turnitin are enabled, the copied assignment allows Turnitin to be enabled at the same time, even though SafeAssign is already enabled.

As a result, both SafeAssign and Turnitin originality reports are generated.

---

## Steps to Replicate

1. Log into **Blackboard Learn Ultra Experience** as an instructor
2. Create an Ultra course
3. Associate the course with a hierarchy node where Turnitin integration is not enabled
4. Within the course, create an assignment and enable SafeAssign in the assignment settings
5. Create another Ultra course
6. Associate the course with a hierarchy node where both SafeAssign and Turnitin are enabled
7. Copy the assignment from the first course to the second course
8. Enable Turnitin in the assignment settings
9. Access the copied assignment as a student
10. Upload a file and **Submit**

## Observed Behavior:

Both SafeAssign and Turnitin originality reports are generated.

## Expected Behavior:

Enabling Turnitin should disable SafeAssign originality report.

---

**Summary**

SafeAssign and Turnitin are both enabled in Ultra assignment at the same time.
