

Scheduled Jobs Migration for Azure Deployment

Article Number

000091044

Document Type

Maintenance Release

Information

Overview

In CampusNexus Student (CNS) versions prior to 21.0, the SQL Server Agent has been used for configuring scheduled and recurring processes. These are processes that are an integral part of the CNS system. Examples of scheduled jobs: Populate Audit tables, Refresh Dynamic Student Groups, Purge History tables, Process Status Changes. A full list of the jobs currently deployed with version 21.0 is included at the end of this document.
