

# LTI Launch From the Gradebook Does not Apply &#39;Launch in a New Window&#39; Setting

## Article Number

000077784

---

## Description

When an instructor launches an LTI item for grading through the "Grade user activity" option of the gradebook in Original courses, Learn does the launch in the same window regardless of whether the item/placement was created selecting the "Launch in new window" setting.

---

## Release (General)

9.1;SaaS

---

## Service Packs

Learn 3900.67.0;Learn 3900.69.0;Learn 3900.71.0;Learn 3900.74.0

---

## Steps to Replicate

1. Login to **Blackboard Learn** as an administrator
2. Install any LTI tool
3. Create an LTI 1.3 placement with the option **Open in a new window** selected or **Deep linking placement**
4. Create a new Original course and enroll an instructor and students
5. Create an item through Deep linking, making sure it opens in a new window (payload must contain the display property) or a regular LTI 1.3 link with grading enabled
6. Within the course, go to **Grade Center > Full Grade Center**
7. Locate the column of the item that was created
8. Click the chevron next to any of the students within the same column > **Grade User Activity**

## Observed Behavior:

LTI launch is done in the same card, replacing the Learn User Interface.

## Expected Behavior:

Item launches in a new window as specified in either the placement configuration or the deep linking return payload.

---

## Summary

When an instructor launches an LTI item for grading in the gradebook, Learn will open it in the same window even though the "Launch in new window" setting is on.
